Feedback process of the institution:

The Sri Krishna Institute of Technology collects the feedback on curriculum aspects and courses from different stakeholders such as the students, parents and teachers which is prescribed by the university.

The Students' Feedback on curriculum and teaching learning process at SKIT is designed to get formative feedback from students that can be used towards the improvements in the quality of course design and delivery, as well as student learning experiences. For the academic year 2018-2019, students' feedback is sought from all departments about the curriculum and teaching learning process. Majority of the student population agreed that the syllabus is very much challenging and the allocation of credits is appropriate in relation to the level of course work. Few students agreed that the content provided in the syllabus is well sequenced and equipped them with necessary technical skills required for their professional areas. It is observed that many of the respondents agreed that the courses are in tune with their respective field of specialization. The students' feedback revealed that they strongly agreed to the point that the elective courses that are offered are much relevant to the specialization streams and technological advancements.

The majority of the teachers' feedback reflects that the Syllabus is suitable to the course and there is a good balance between theory and lab. Various suggestions related to the modifications in the curricular content are noted for further necessary action.

The feedback analysis reports that from the parents clearly depicts their satisfaction towards the curricular activities rendered by the University. From the analysis it is evident that the parents believe that their wards develop good soft skills and ethical values during their course of study. It is observed that they have expressed that their expectations towards the institution have been fulfilled especially from the employability point of view.
