Brief Report

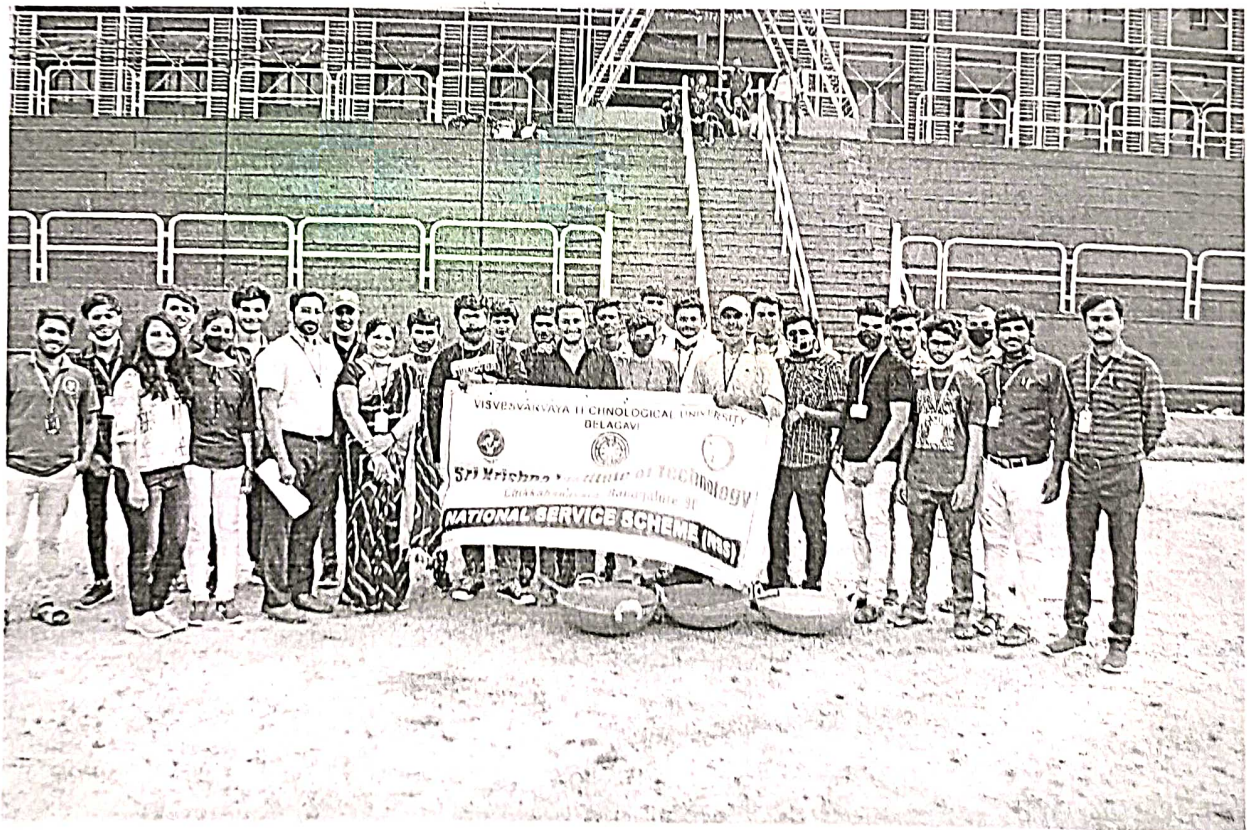

SKIT NSS Team organized a plastic free campus event on 25th October 2021,

Colleges can generate enormous amounts of plastic waste, which is toxic to people and the environment, and never goes away.

- Plastic pollution is a real issue – just look around
- Plastics are made from oil and gas and their production harms our environment from added greenhouse gases.
- Nature can't digest it, Plastics break UP into smaller pieces called micro-plastics. It never breaks down.
- Plastics affect millions of sea and land creatures who are injured or killed eating them.
- Plastics are now found everywhere: in our food, drink, in nature and all over the planet.
- Plastic food and drink packaging often contain harmful chemical additives that affect human health.

NSS UNIT SKIT aims to measurably reduce plastic waste and pollution in college campuses and the world around them. To eliminate plastic pollution and its toxic impacts on people and the environment. The event scheduled between 2.30pm to 4.00pm and successfully completed and collected around 3.5 kg of plastic waste
